

Kyber Security

is a proud TANGO Partner

Services: Information Technology & CyberSecurity

KYBER SECURITY

Nonprofits often tend to be targeted by cyber criminals due to a lack of resources to implement cybersecurity measures. They are just as susceptible to a data breach as for-profit organizations, if not more. However, they tend to resist the same level of changes that for-profit organizations are making to implement a sophisticated cybersecurity program.

At Kyber Security, we believe that IT security is not a single destination, it's a way of life. From phishing attacks, to hackers, to internal theft and beyond, your organization is always under attack. Your organization needs to be vigilant every day to ensure that you are not the next victim of a cyber attack.

We can support and protect your organization. With our defense-in-depth services, we can ensure that your organization is protected while your end users are vigilantly supported.

You're not secure, until you're KyberSecure™
