

Novus Insight

is a proud TANGO Partner

Services: Technology Consulting & Data Management

Novus Insight is a technology services and nonprofit data solutions firm. Until 2020, we were a subsidiary of the 501(c)(3) nonprofit Connecticut Center for Advanced Technology. We are now an independent company but still very much tied to our nonprofit roots. As a purpose-driven business, our mission is to be not only a trusted technology advisor to our clients but also a developer of solutions that positively impact the communities they serve.

In addition to providing IT-related support and helping clients reduce their cyber risk, we assist organizations in effectively managing their most important data. Program management and overall management of data collected remains a significant challenge for most nonprofits. Over-reliance on spreadsheets, excessive steps built into workflow processes, and applications that don't talk to each other are just a few of the common hurdles faced on a daily basis.

There are many ways nonprofits can materially improve operational efficiencies by managing critical data better. Intake, case management, referral tracking, accurately measuring outcomes & impact, funder reporting – all key areas in which nonprofits struggle to operate and collect data, and where Novus is focused on creating solutions to solve problems.

TANGO Region Served:
Nationwide
